

Density explains only part of the geography of vote concentration

Residual CENP after a descriptive département-level regression of CENP on log population density, 2022.

OLS over the 96 départements: $CENP = a + b \cdot \log(\text{density})$, $R^2 = 0.33$. Residual = observed – fitted CENP. Descriptive, not a causal adjustment.
Sources: Ministère de l'Intérieur (first-round results), INSEE (population, surface). 96 metropolitan départements.
