

Supplementary: change in CENP, 2002 to 2022

90 of 96 départements recorded higher CENP in 2022 than in 2002 (mean across départements: 0.51 in 2002, 0.62 in 2022).

$\Delta\text{CENP} = \text{CENP } 2022 - \text{CENP } 2002$. $\text{CENP} = (K - \text{ENP}) / (K - 1)$, with $K = 16$ candidates in 2002 and 12 in 2022; it depends on K , so figure 2 (ΔHHI) is the main comparison.
Sources: Ministère de l'Intérieur (first-round results), INSEE (population, surface). 96 metropolitan départements.
