

Concentration of the first-round vote by département (HHI)

HHI within each election. Each map has its own colour scale: compare départements within a year; figure 2 shows the change.

2002

Mean HHI 0.120 2022

Mean HHI 0.196

HHI = $\sum (\text{vote share})^2$, higher = more concentrated. Mean HHI = unweighted mean across départements. The two colour scales differ.
Sources: Ministère de l'Intérieur (first-round results), INSEE (population, surface). 96 metropolitan départements.
